PORTFOLIO SHOWCASE

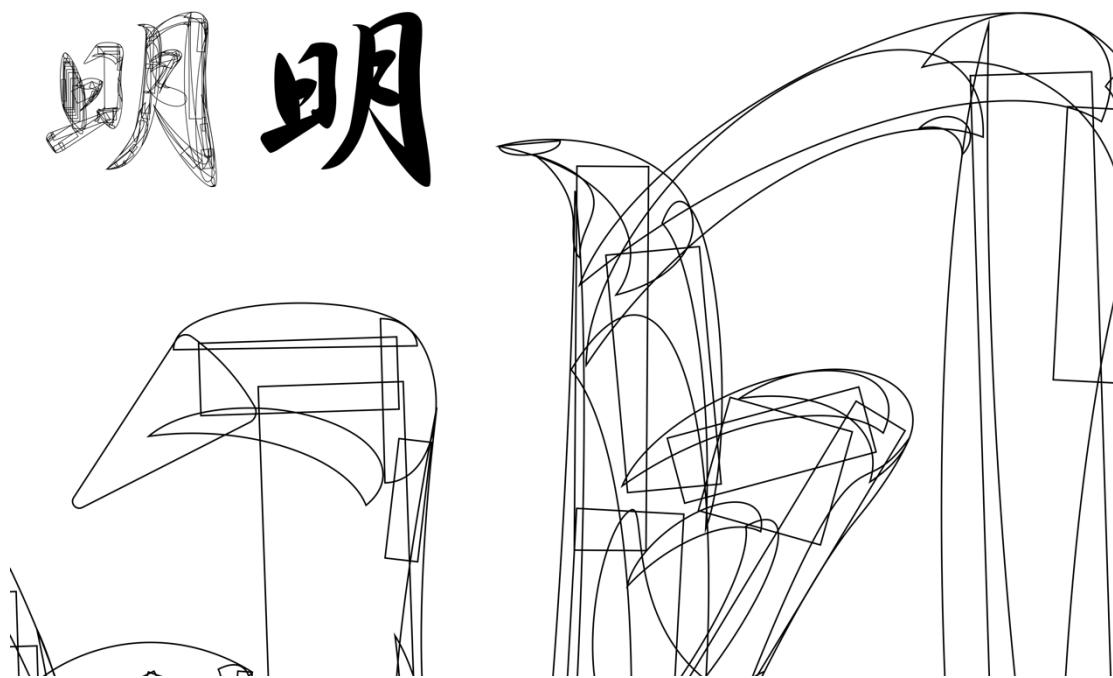

- MY BUILDING BLOCKS -

I have always been fascinated about what graphic design can bring to this world: a piece so dynamic, so lively but then again so simple at times. However, I've never had proper education on how to use the Pen tool for designs, so I also got creative from there: putting together hundreds and thousands of common & basic shapes (provided by the “Assembly: Art and Design” app) to create something more.

- MY TIME AT THE “ART OF JAPAN CLUB” -

I've learnt so much about Japanese culture but at the same time but more importantly, I've been nurturing my illustrative skills & techniques.

1. Asian art of typographical logography – Character of “Light” and “Clarity” 「明」

I find the job of recreating the soft but firm handwritten strokes challenging, but satisfyingly beautiful. This also is the perfect snapshot of the bare “skeleton” of my “basic shapes that make the bigger picture”.
